

Information on the impact of the activities carried out by the organizational unit on human health and the environment

Fulfilling the legal obligation arising from Art. 32c. paragraph 2 of the Atomic Law Act (Journal of Laws of 2023, item 1173), we would like to inform you that the company Geofizyka Toruń S.A. conducts well logging activities related to exposure to ionizing radiation, consisting in the transport and use of sealed radioactive sources and devices that contain sources of ionizing radiation.

The activity is carried out on the basis of permitting decisions of the President of the National Atomic Energy Agency No. D-16607, D-18436, D-11968, D-20365 and D-21163.

Based on individual dose measurements and leak tests of sealed radioactive sources, it is concluded that:

- activities involving exposure to ionizing radiation in the last 12 months did not have a negative impact on human health and the environment,
- the entity does not release radioactive substances into the environment.

During the last 12 months, no emergency situations related to the use of ionizing radiation were recorded, and the dose limits specified for employees were not exceeded.
